CHEMICAL ANCHOR
SYSTEMS YOU
CAN TRUST

Hilti Chemical Anchor Systems

For a specifier or installer of anchoring connections, ensuring the safety and longevity of the build is paramount. That's why our products undergo extensive trials and technical assessments.

We offer a full suite of ETA assessed chemical anchoring solutions to suit every application from basic through to the most complex and challenging. Our wide range of injectable and capsule adhesive systems provide reliable solutions for fastening threaded rods, rebars and other elements to concrete, masonry and natural stone.

Our products are backed by an extensive array of technical resources including software, ETA documentation, technical data, installation instructions and videos.

CHEMICAL ANCHOR TECHNOLOGIES TO SUIT ALL NEEDS

The Hilti chemical anchor portfolio

Ultimate performance

- NCC compliant 
- Ultimate bond strength
- Highest level of approvals

Everyday standard

- NCC compliant 
- Versatile all-rounder
- Ideal for “open” specifications

Economical solution

- Versatile all-rounder
- Non safety-critical applications
- Non-structural applications
- Applications not covered in design drawings

HILTI HIT: VERSATILE SOLUTIONS FOR EVERY APPLICATION

Hilti injection technology HIT

- Wide range of applications
- Light-duty through to heavy-duty solutions
- Allows flexible anchor design and installation
- Solutions for all base materials

CHEMICAL ANCHOR TECHNOLOGIES TO SUIT ALL NEEDS

The Hilti chemical
anchor portfolio

HILTI HVU2: SIMPLICITY IN A CAPSULE AND ROD SYSTEM

Hilti capsule technology HVU2

- Anchors can be loaded almost instantly – only 5 minutes curing time at 20°C and above
- High performance in cracked and uncracked concrete.
- Each capsule contains exactly the right amount of resin, for maximum efficiency and economy – no wastage and no need for complex calculations
- Tough and resilient soft foil capsule – no more risk of breakage, like with glass capsules

ALL BASES COVERED

Chemical anchors for all
common base materials

Base material		Product
Concrete		 <p>RE 500 V3* RE 100 HY 200* HY 170 HY 10 HVU2*</p> <p>* Small edge distance and spacing</p>
Masonry		 <p>HY 270 HY 170 HY 10</p>
Natural Stone		 <p>RE 500 V3 RE 100</p>
Glass		 <p>HY 270</p>

DIAMOND CORED OR WATER-FILLED HOLES? /

No problem for our premium chemical anchors

FASTER AND SAFER INSTALLATION

/ Our dispensers speed up the job and make injecting easy and safe

Dosing knob for accurate borehole filling and no mortar wastage

HDE 500-A22 The battery dispenser

- Speedy dispensing without compromising safety
- Up to 3 times faster than manual dispensing with no dripping
- Performance : ~ 700ml/ min
- Suits 500ml and 330ml tubes

Work continuously without getting tired

Battery compatible with all Hilti 22 volt cordless tools.

HDM 500 The manual dispenser

- Robust and reliable
- Ergonomic design for easy handling
- Suits 500ml and 330ml tubes

HDM 330 The lightweight manual dispenser

- Where light weight is required or work space is limited
- Suits 330ml tubes

P 8000 D The pneumatic dispenser

- For speedy dispensing in large diameter holes
- Performance ~ 20 sec for 1400ml tube

SAFESET

No hole cleaning

Dustless and reliable setting, using Hilti SAFESET auto-cleaning feature of the hollow drill bit.

- Automatic hole cleaning for direct injection
- Wide range from M12 to M35
- Available drill depth up to 1000 mm
- NCC compliant only with HVU2 capsule, RE 500 V3 and HY 200

SAFESET

Fast installation in cored holes

Roughen diamond cored holes for seismic conditions or cracked concrete.

- Faster installation thanks to less hole cleaning
- Achieve higher loads
- NCC compliant only with RE 500 V3

Hole cleaning accessories

For manual and machine cleaning.

- $\leq \text{Ø } 55\text{mm}$
- All hole depths

Secure injection

Total installer safety and reliable setting with Hilti piston plugs and drip guards for overhead anchoring.

- No air bubbles
- No mortar blow out
- Less mortar

- No dripping

YOUR FIRST CHOICE CHEMICAL ANCHORS / Why choose Hilti

1

Hilti anchors comply with AS 5216:2018 (SA TS 101) and the National Construction Code

2

Work dustless with the SAFESSET system for a healthy working environment

3

Battery dispenser allows safe, fast, repetitive use

4

Unique foil pack minimises mortar wastage

5

Volume Calculator App tells you exactly how much chemical you need

6

Low VOC levels are Green Star compliant

MECHANICAL
ANCHOR SYSTEMS
YOU CAN TRUST

Hilti Mechanical Anchor Systems

Our extensive range of mechanical anchors covers fixings for all kinds of base materials, from concrete and precast panels through to masonry and hollow blocks. We have fastening solutions for different environments and applications.

And for your peace of mind, our anchors are proven to provide the strongest solution for safety critical applications - fully backed by technical documentation, software and engineering services.

SERVICE AND SOFTWARE

Hilti Service and Software

We make your projects easier, safer and more productive by automating complex calculations and reducing the need for in-depth engineering expertise. Our design software solutions are based on tested and approved Hilti technologies and international codes to ensure you safely and reliably design applications.

Our team of engineers will work with you on-site and on the phone across Australia.

We provide expert advice, when and where you need it

Our on-site anchor testing ensures the quality and safety of the end result

Hilti anchors comply with AS 5216:2018 (SA TS 101) and the National Construction Code

Profis software ensures the ideal solution for the application design

Our national team of engineers provides specialist support to ensure the job is done right

Our state of the art PROFIS software assists planners and specifiers make the necessary calculations to design anchor and rebar connections with simplicity and certainty.

SIMPLICITY

- Easy to use visual software makes it easy to model your exact application
- Full access to Hilti's BIM/CAD objects integrated within the software
- Detailed design reports created automatically to provide your project documentation
- Automatic software updates ensure you are always working with the most current product approvals and latest design methods

CERTAINTY

- Compliant with the National Construction Code and standard AS 5216:2018 (SA TS 101:2015) Design of post-installed and cast-in fastenings for use in concrete
- Filter ETA pre-qualified products by intended use in accordance with AS 5216:2018, for easy selection of the right anchor product with the right ETA approval
- Meet design challenges which fall outside the scope of AS 5216:2018, such as seismic design with seismically approved anchors
- Access to SOFA and FIB allows a wider range of standard anchor layouts as well as the ability to design fully customised layouts
- Other design methodologies such as ETAG and ACI can also be used
- Full support from Hilti Field Engineers nationwide

LEARN MORE ABOUT PROFIS

TECHNICAL CENTRE / FIELD ENGINEERS

Our experienced engineers ensure the job gets done right, the first time. Available both on the phone and on-site, they offer technical support for complex applications, training and site-testing.
